Arya College of pharmacy is dedicated to use its resources and provide clean eco- friendly environment with proper waste management.

Solid& Liquid Waste Management

Solid waste management

Waste management & recycling helps the Arya campus to achieve its goal to reduce the amount of waste production. The major sources of solid waste generation are campus followed by various hostels. Waste is collected daily from dustbins.

Liquid waste management

Water monitoring is done regularly to analyze unit cost of water and volume of water used. Waste water treatment process facilitates the treatment of existing contaminants in the water or reduces the concentration of such contaminants so that the water becomes fit for the desired use.

Waste water generated in the campus is disposed off into sewage treatment plant (STP). The sludge settled in the STPs is removed and is used as manure for the gardens and landscaping. Thus, the entire waste water which is generated in the campus is treated and used.
